

977

papers built on the first paper of my PhD.
I followed every citation. Here's what I found.

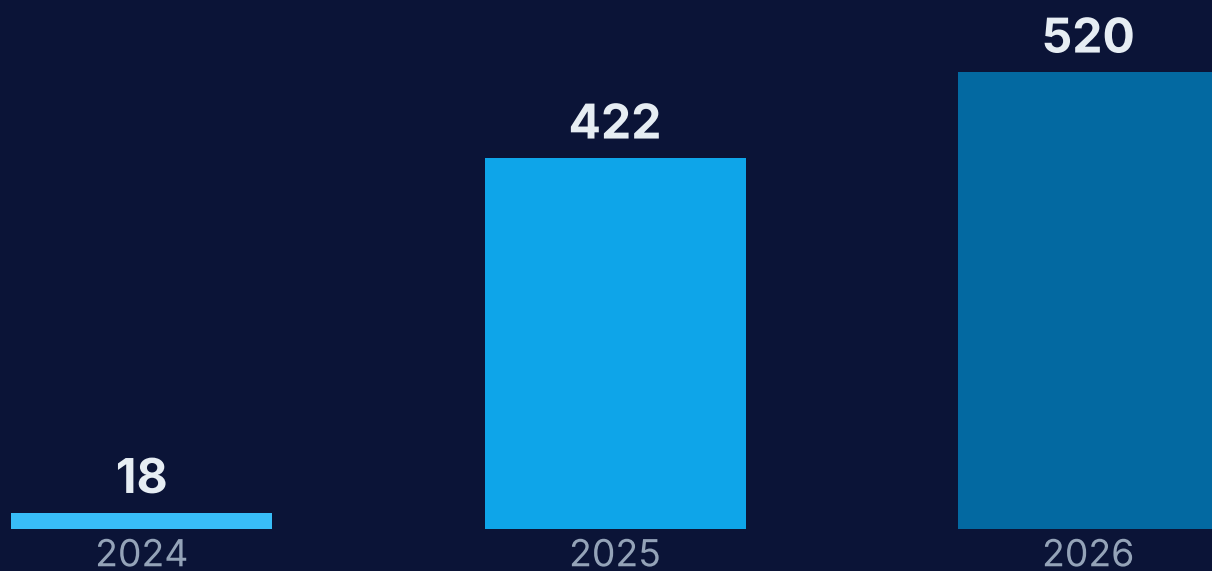

swipe →

96%

of these 977 papers were written
AFTER my paper, in just 2 years.

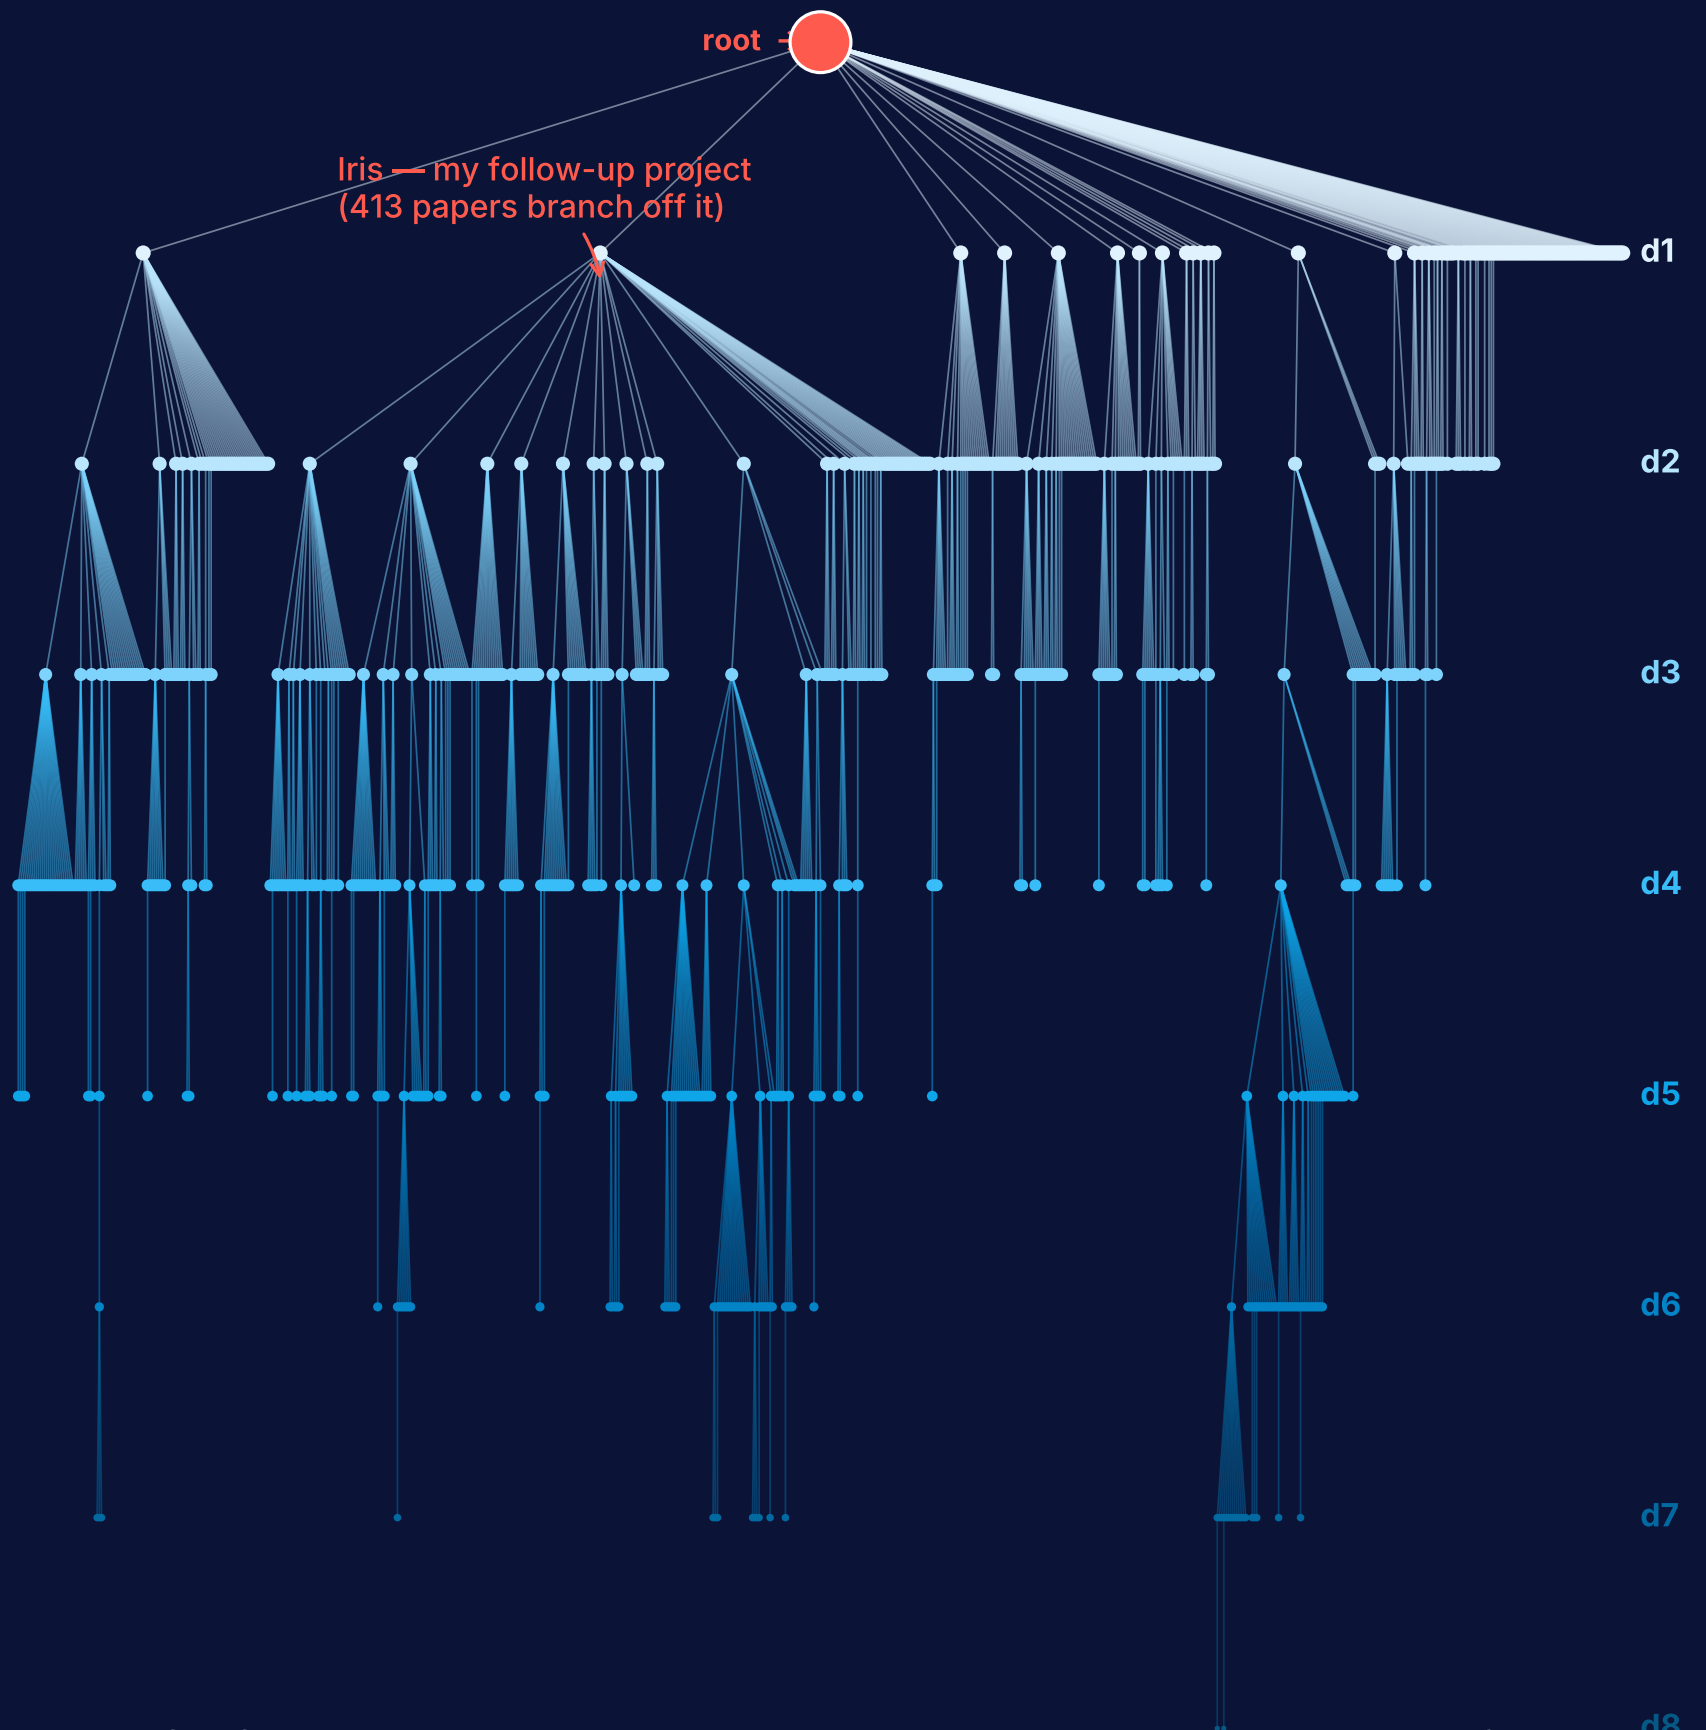

The field is moving fast.

When were the 977 papers written?

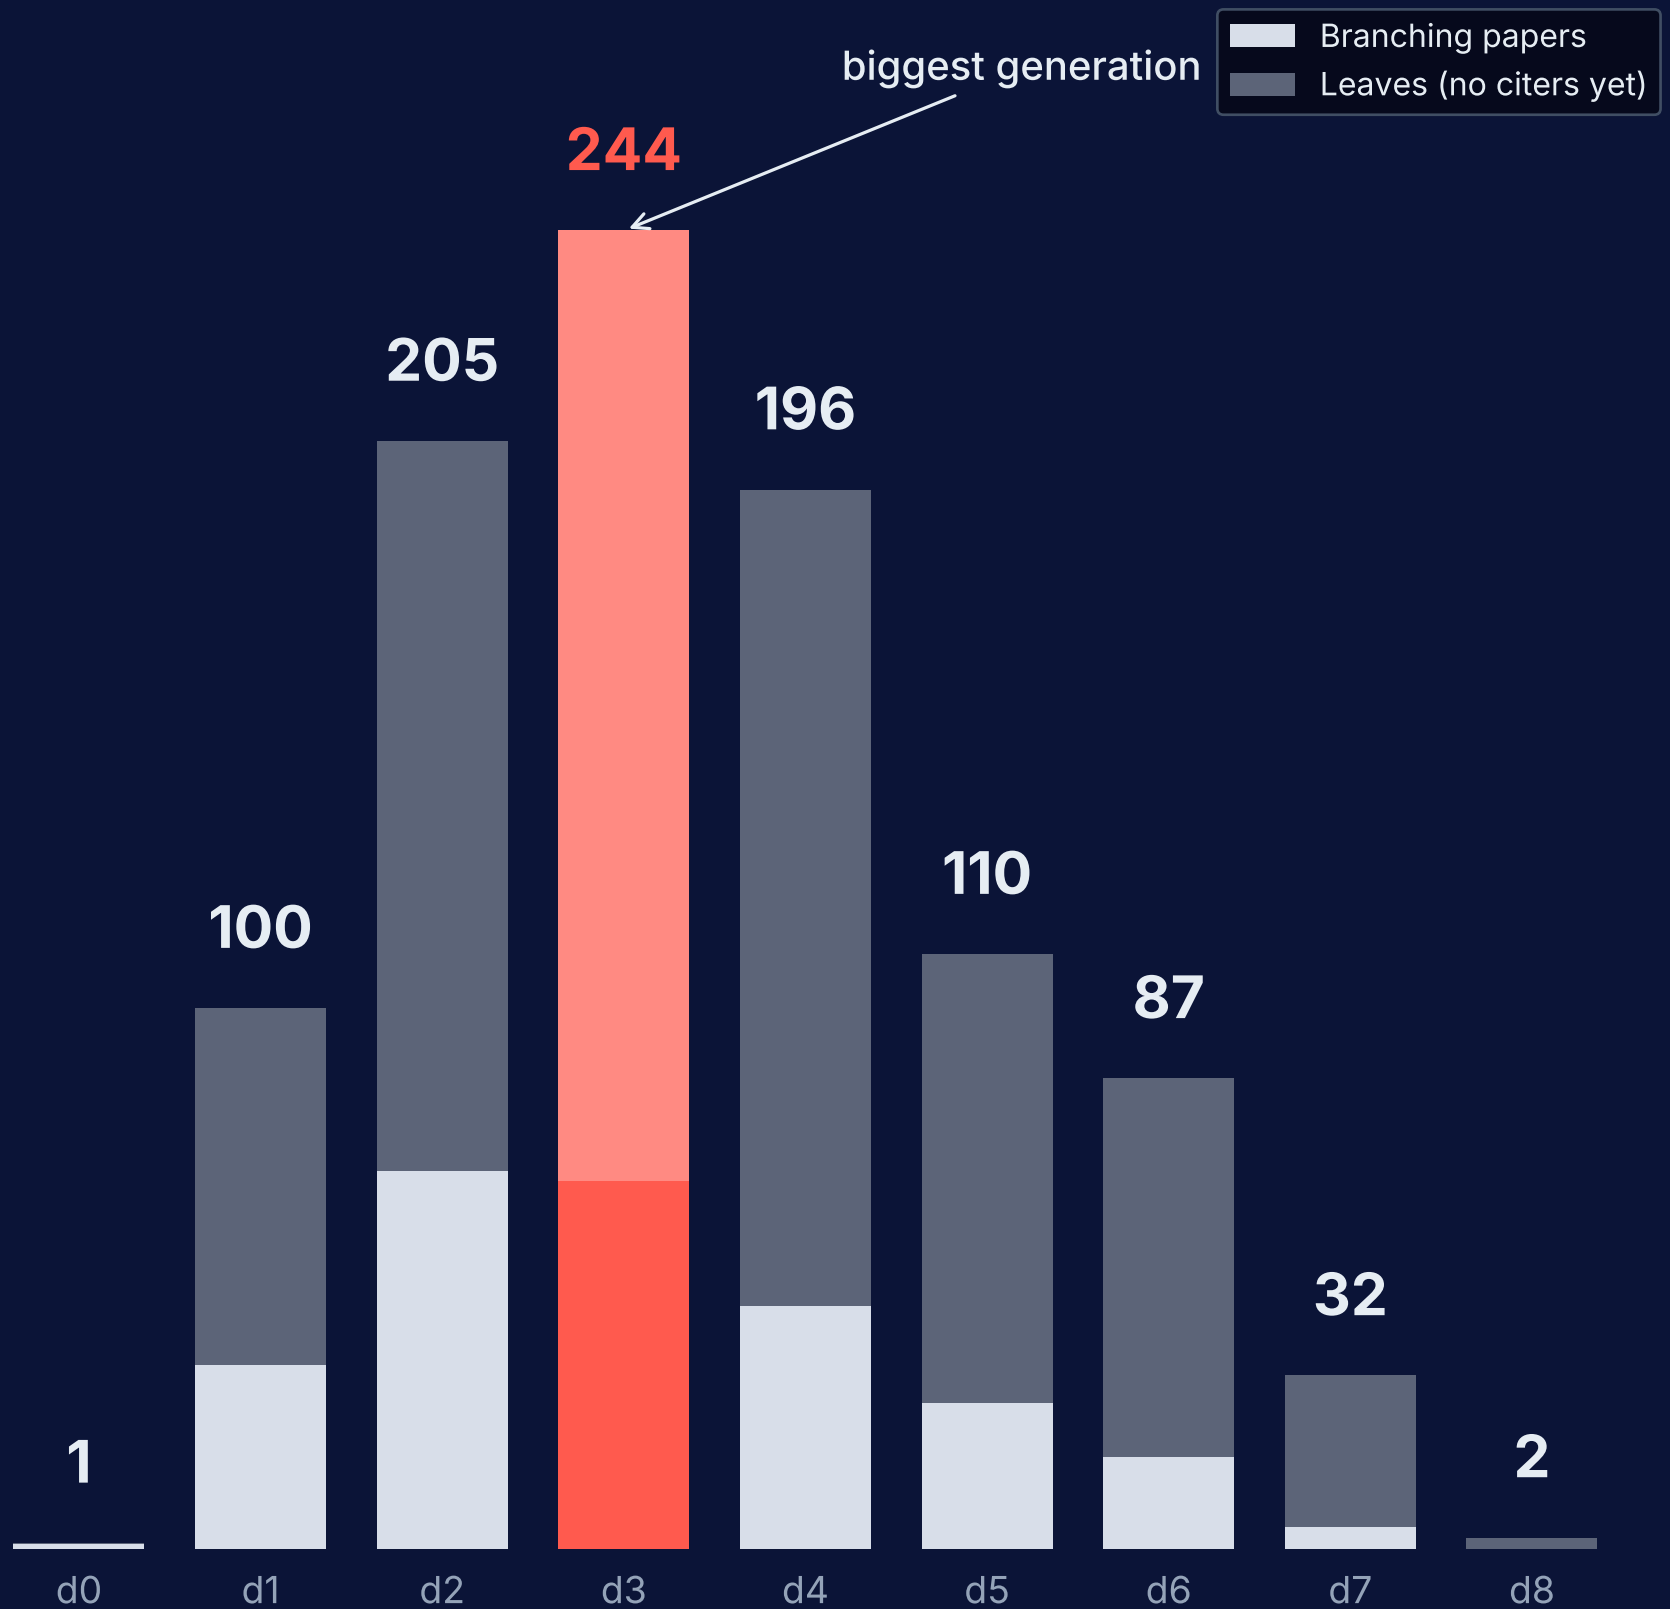

From 1 paper to 977.

Each layer = one generation away from my paper.

How many papers per generation?

The 3rd generation is the biggest — 244 papers.

The 5 most-cited papers building on mine.

These are the ones really moving the field forward.
